

This year, MSLAW will implement a new emergency alert system. This system is designed to notify students of emergency conditions, dangerous persons, or other hazards on campus via SMS Text Message, Robo-Call, and via email.

We encourage all students to opt-in to this service, as it is the most efficient method of informing our entire student-body and community quickly in case of an emergency situation here at MSLAW.

The system is designed to notify each recipient in the method he or she chooses, but that choice should reflect the form of delivery that will be read most immediately.

Please enter the appropriate contact information below to opt-in to the emergency alert notification system.

Thanks,
MSLAW
