

Mac OS X 10.5 or later

1. First you will need to download mac printer driver
2. Run Popup.dmg
3. Open System Preferences and click on the Print Fax icon.
4. Click the + button.
5. Hold down the Control key on the keyboard and click anywhere on the toolbar. From the popup menu that appears, select *Customize Toolbar...*
6. Drag the Advanced icon to the toolbar and close the customization dialog.
7. Click on the Advanced button in the toolbar.
8. From the Type popup button, select Pharos Print Server.
9. Enter values of *Device Name* [Kyocera],
10. *Device URI* [[173.210.35.182/Kyocera](#)] and
11. *Kyocera Fs-200D* based on printer.
12. Click Add. The new Popup queue will now show up in the list of printers.
13. To print to the new queue, select it from the printer popup button in the print dialog of any application.

If you have any problems please let me know

Best wishes,
Daniel C. B. Harayda, Esq.
