

A decorative border of repeating black floral motifs surrounds the text on a light green background.

Greetings, this is Luna! It would be my pleasure to serve as your SBA President. I work on intellectual property matters, medical and scientific innovations for improving health and wellness. In my free time I do a variety of activities including reading, writing, music, cuisine, gardening, yoga, making friends and volunteering with different groups. During my doctoral studies in Biomedical Sciences and professional work in Intellectual Property, I have served as President and Chair at many associations. I will bring those experiences to SBA.

My goals for SBA are to have activities for professional development, social and community service. Together with the SBA and MSLAW, we will have student outreach and networking with alumni. We will organize events jointly with other groups within MSLAW. We will invite speakers and brainstorm on topics relevant to our professional development. We will host community service projects. We will work together, develop further and have fun. I welcome your suggestions and participation. I would appreciate your vote!
