

MASSACHUSETTS SCHOOL OF LAW at ANDOVER

Spring 2023

PROFESSIONAL CAREER DEVELOPMENT

Professor Paula Colby-Clements pcolby@msslaw.edu

The Professional Career Development course is a one credit course designed to give you an early start on the process of career planning and development. The process involves thoughtful self-assessment, career exploration (fields of practice and non-traditional avenues for those with a Juris Doctor Degree), planning and follow-through with preliminary employment strategies. The philosophy of this course is to have you develop an ongoing systemic approach aimed toward establishing a fulfilling work life when you complete law school. Engaging in this ongoing process should be challenging, interesting, and enjoyable. This will be accomplished by engaging in meaningful reflection on the process of professional formation, by considering individual values, strengths, and interests, examining the culture and expectations of the legal profession, and developing key tools and strategies necessary to pursue and succeed in employment.
